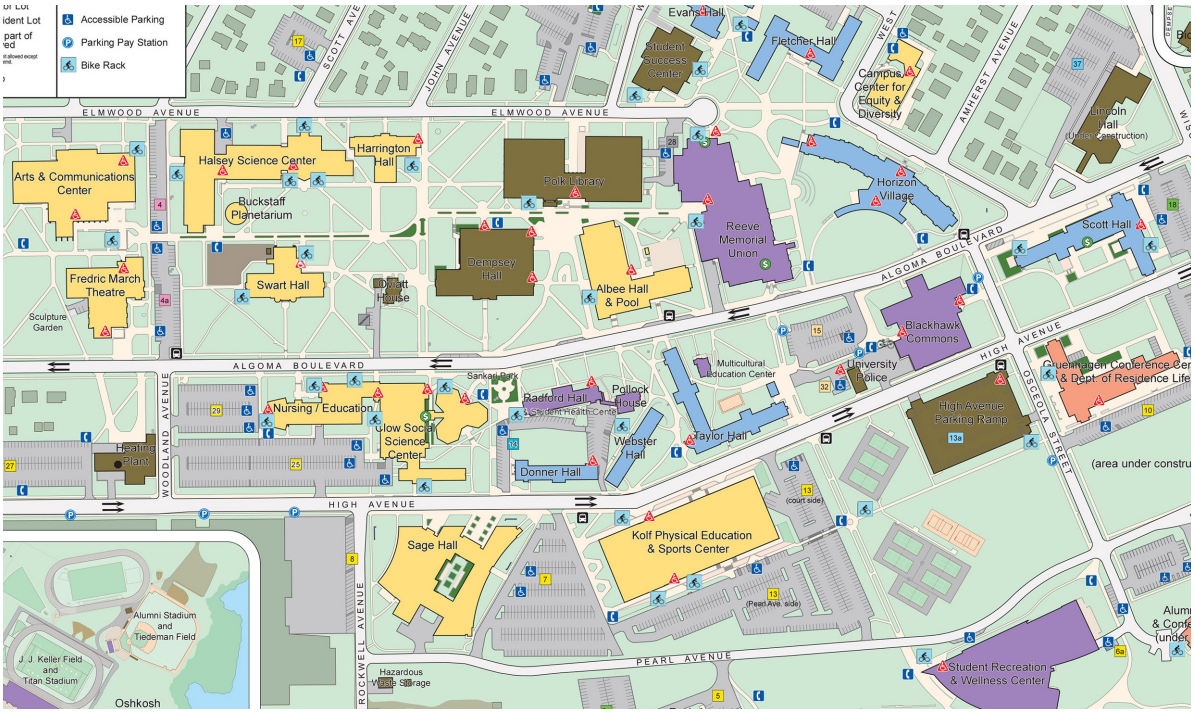
Mapping UWO in Real Time
Stage #1: Gathering Information

ART 236 Experience Mapping
Cutler-Lake

Name:

Location (circled):



Write down everything and everybody you notice. How are people using the space? Are they spending time or simply walking through? Are they in groups or alone? How many people are glued to their phones? How many people are waring headphones? Is anyone studying? Is anyone asleep? Do you find anyone annoying in any way? Is it quiet or loud? Are food or beverages being consumed? Do people seem grumpy or excited? What is the ratio of students to UWO staff? Does anyone seem completely lost? Does anyone leave and then return? Does anyone acknowledge your presence? Consider all of this and more.

You should have multiple observations. Record below and continue on back. Add another page if necessary. You will turn in this sheet when you return to class. Record as much as you can.

***Specific* Location:**

Observations between 8:45 and 9:15 am on February 26, 2015:
